EDUCATION

B.Tech in CSE with AIML

Guru Gobind Singh Indraprastha University, Delhi

Batch 2026

CGPA 7

EXPERIENCE

Prodigal AI | Gen AI Intern

June 2025 – August 2025

- Built a GenAI knowledge-retrieval system using Gemini API, semantic search, and embeddings, cutting query time by 50%.
- Designed scalable backend modules ensuring traceable, verifiable document-grounded AI answers.
- Automated business insights using a modular Telegram bot, reducing manual reporting by 80% across multiple teams.

IBM | Frontend Engineering Intern

June 2024 – August 2024

- Collaborated with a team of 4 engineers on a complex web application, fixing 15+ UI bugs weekly and boosting overall customer satisfaction, becoming the team go-to expert for UI troubleshooting.
- Implemented reusable frontend components and optimized API data handling, reducing page load times by ~30% and improving code maintainability across the application.

SKILLS & PROJECTS

➤ Tensorflow, Keras, Pytorch, CNN, Python

AI Crop Doctor | [GitHub](#) | [Live](#)

June 2025

Frontend – HTML, JS, CSS | Backend – Flask | Google Services – Gemini, Firebase

- Built a full-stack GenAI + Vision system for plant disease detection (38 classes) with 98%+ accuracy on 70k+ images.
- Integrated Gemini to generate 5-section diagnosis reports; deployed real-time prediction (<5s) with Firebase history tracking.
- Implemented an LLM-grounded reasoning layer to provide action-oriented recommendations, enabling context-aware disease explanations and improving farmer decision accuracy in field testing with custom contextual Chatbot.

Drive-Detect | [GitHub](#) | [Live](#)

April 2025

Frontend – React | Backend – FastAPI, Uvicorn

- Made a CNN-based machine learning model for autonomous vehicles, reaching 95% accuracy in traffic rule prediction from 40,000+ traffic board images and improving decision-making in urban driving scenarios.
- Optimized model inference speed by 30% with Flask-based deployment, enabling edge-device integration and real-time traffic sign recognition using Python, PyTorch, and OpenCV.

➤ React, Next.js | Springboot, Java | PostgreSQL | Agentic AI

Aycart (E-commerce Platform with AI Agent) | [Frontend](#)

October 2025

- Currently building an AI Shopping Agent to autonomously complete checkout flows using LLM reasoning + API actions.
- Developed frontend + backend architecture for a scalable shopping platform.
- Designed modular APIs and event flows to support AI-driven cart actions, making the platform ready for future autonomous features like smart recommendations, price optimization, and conversational shopping.

➤ RAG | LlamaIndex | ChromaDB | Vector Embeddings | LLM Integration

Knowledge Assistant | [GitHub](#)

May 2025

- Built a RAG-based Knowledge Assistant supporting 3+ document formats (including PDF, CSV, TXT) and handling 1,000+ document chunks for accurate natural-language Q&A.
- Implemented LlamaIndex + ChromaDB to generate and store 10k+ vector embeddings, reducing query response time by 40% through efficient similarity search.
- Developed 2 user interfaces (CLI + Streamlit UI) enabling end-to-end ingestion and querying with sub-second response latency for most queries.

ADDITIONAL SKILLS

- **Database / Version Control / Tools / Deployment** : MySQL, GitHub, JIRA, Postman, Vercel, Render
- **Soft Skills**: Communication, teamwork, adaptability, problem-solving, time management

ACHIEVEMENTS

- Google - Secured 23rd position in PromptWar 2.0.
- Winner (1st Place): Inter-University Hackathon (200+ teams).
- **Top 100** – BYD Innovate-a-thon for automotive ML innovation
- Advanced to round 2 of Flipkart Grid 6.0.
- Solved 300+ problems on LeetCode, strengthening data structures and algorithm skills.

POSITION OF RESPONSIBILITY

- GenAI Lead at ACM, guiding student projects and organizing technical initiatives.
- Mentored 500+ students through workshops and hands-on mentorship sessions
